

NEW FAMILY SLEEP CHAIRS

LIGHT UP THE NIGHT

Everyone can light up the night for new Family Sleep Chairs for the 72 inpatient rooms at Driscoll Children's Hospital. These high quality chairs have been carefully constructed with comfort and safety in mind. Each new family sleep chair folds out into a single comfortable bed for parents and families who find themselves staying overnight with their sick child. Sleeping arrangements within a hospital room should cause no concern to any parent or guardian – they should be conveniently offered, in top-quality shape, and comfortable. It's a priceless gift to the young patients to guarantee that a loved one is close by their side throughout their hospital stay.
